Dear Authors,

Congratulations on the acceptance of your paper ID 513 titled "**Healthcare Insurance Fraud Detection Using Blockchain and AI**" for oral presentation at ICONIC 2K25. We appreciate your contribution to the conference. To proceed with the publication process, please carefully go through the attached reviewer comments and make necessary modifications to address the identified deficiencies in your paper. Ensure that the corrected version follows the **CRP (Camera-Ready Paper) format** provided on the website.

Hello,

The following submission has been created.

Track Name: Evolution of Computing Intelligence

Paper ID: 513

Paper Title: Healthcare Insurance Fraud Detection Using Blockchain and AI

Abstract:

Any major problem in healthcare insurance fraud can result in significant challenge, leading to financial losses and can also erode systemic confidence. With the increasing reliance on health insurance for covering medical expenses such as hospitalization, treatment, and preventive care, ensuring security and fraud prevention has become crucial. Conventional rule-based fraud detection techniques find it difficult to keep up with changing fraudulent patterns. To address this, a blockchain and AI-powered system is introduced, leveraging blockchain for secure and tamper-proof data management and AI-driven analytics for intelligent fraud detection, enhancing transparency, accuracy, and security.
